SUMMARY

B.Tech CSE (AI & ML) student with hands-on experience building AI/ML applications across cloud, IoT, LLM-based assistants, and data analysis. Works in Python, TensorFlow, PyTorch, scikit-learn, Flask, and SQL. Completed two internships (AI & Cloud engineering; AI research and operations automation) and led technical teams on academic and international projects.

EXPERIENCE

Applied AI Research & Operations Automation Intern — GO-BRICS Business Lab

May 2026 – Jun 2026 · Letter of Recommendation (view)

- Conducted international product and market research for business decision-making, using AI-assisted tools to accelerate analysis and surface actionable insights.
- Identified process-improvement opportunities and supported workflow optimisation on operations-automation projects.
- Worked with cross-functional, multicultural teams in a global environment and delivered assigned tasks on schedule.

AI & Cloud Engineer Intern — Edunet Foundation (IBM · Shell · VOIS · VI), Remote

Jul 2025 – Nov 2025 · Project code: github.com/Tusharkapoor-oop/VOIS_AICTE_Oct2025_TUSHAR-KAPOOR

- Led a 4-member agile team as technical lead; built an AI chatbot on IBM Cloud and AWS with a Flask REST API backend.
- Built predictive ML models and automation pipelines in Python, TensorFlow, and scikit-learn across two client project tracks.
- Presented findings in 8 weekly sessions, turning model outputs into recommendations for the final project roadmap.

PROJECTS

AI-Powered Nutrition Assistant — Agentic AI · USDA dataset (10,000+ records) **(post)**

Python · TensorFlow · Streamlit · scikit-learn · MySQL · IBM watsonx.ai

- Deployed an agentic nutrition assistant on IBM watsonx.ai (Llama LLM) that gives personalised dietary recommendations from location, weather, and user preferences.

EcoSphere — Environmental Intelligence Platform — Team Lead, 5 members

Jan 2025 – Mar 2025

Python · TensorFlow · AWS IoT Core · Streamlit · MySQL

- Built a TensorFlow anomaly-detection pipeline on live IoT sensor streams (air quality, temperature, humidity) via AWS IoT Core.
- Stored data in MySQL with a real-time Streamlit dashboard; presented at the K.R. Mangalam University AI Project Showcase, Mar 2025.

Energy-O-Thon — International AI Hackathon — International Team Lead

Nov 2025

Python · TensorFlow · Flask · Streamlit · REST APIs

- Built a Flask + TensorFlow energy-optimisation tool with a Streamlit dashboard showing consumption patterns and reduction tips.
- Coordinated an international team across time zones and delivered a working demo within the competition deadline.

Business Data Analysis — Real-World Datasets · UCI ML Repository (50,000+ records, 3 datasets)

Python · R · Pandas · NumPy · Flask · MySQL

- Cleaned and analysed 3 business datasets in Python and R; built a Flask app presenting 12 insights and an inventory recommendation.

TECHNICAL SKILLS

Languages: Python · C++ · Java · R · SQL · DSA (LeetCode)

AI / ML: TensorFlow/Keras · PyTorch · scikit-learn · Machine Learning · Deep Learning · NLP

Data & Backend: Pandas · NumPy · Matplotlib · Seaborn · EDA · Jupyter · Flask · REST APIs · Streamlit

Cloud & DevOps: AWS (EC2, S3, Lambda, IoT Core) · IBM Cloud · Docker · Git/GitHub · Linux

Databases: MySQL · Oracle SQL · Microsoft SQL Server

EDUCATION

B.Tech, Computer Science Engineering (AI & ML) — K.R. Mangalam University, Gurugram

Aug 2024 – Expected May 2028 · CGPA: 8.6 / 10 · Sem 4 SGPA: 9.5

HONOURS & CERTIFICATIONS

Honours

Letter of Recommendation — GO-BRICS Business Lab (May–Jun 2026) · Dean's Honour Award — K.R. Mangalam University

Certifications

Microsoft Certified: Azure AI Fundamentals (Aug 2025) · IBM: Journey to Cloud · IBM SkillsBuild · Oracle: Vector Search Foundations · Oracle SQL · Edunet Foundation: AI & Cloud Internship Certificate
